CENTRAL UNIVERSITY OF PUNJAB

Doctor of Philosophy (Medicinal Chemistry)

Batch - 2022

Department of Pharmaceutical Sciences and Natural Products

Graduate attributes

The Ph.D. program in Medicinal Chemistry would provide outstanding education in drug discovery through multidisciplinary training in synthetic organic chemistry, natural products, drug design, molecular metabolism and chemical toxicology, and mechanisms of drug action in preparation for careers in industry, government, or institutions of higher learning. The program would also help students start an industry start-up and become great teachers and independent scientists.

Criteria of Evaluation:

End Term Examination: Subjective Type Test [100 Marks]

Course Title: Research Methodology &

Biostatistics

Paper Code: CMC.701

Learning Outcomes:

After successfully completing this course, the learner would be able to: After successfully completing this course, the learner would be able to:

- CLO 1. Select and define an appropriate research problem and parameter
- CLO 2. Design and set the objectives based on the literature search.
- CLO 3. Protect the research work through patent or copyright or trademarks.
- CLO 4. Learn basic descriptive and inferential statistics, including the concepts and principles of research design and statistical inference.
- CLO 5. Perform and interpret descriptive and inferential statistical techniques, including the construction of tables and graphs, t-tests, Chi-square tests, and regression analysis.
- CLO 6. Use appropriate software packages to solve analytical problems.

Unit/Hours	Content	Mapping with
		course
		learning
		outcomes
Unit 1	General principles of research: Meaning and	CLO1
15 hours	importance of research, Critical thinking,	, CLO
	Formulating hypothesis and development of	2
	research plan, Review of literature, Interpretation of	and
	results and discussion.	CLO
	Intellectual Property Rights: Intellectual Property, intellectual property protection	3
	(IPP) and intellectual property rights (IPR), WTO (World Trade Organization), WIPO (World Intellectual Property Organization), GATT (General Agreement on Tariff and Trade), TRIPs (Trade-Related Intellectual Property Rights), TRIMS (Trade-Related Investment Measures) and GATS (General Agreement on Trades in Services), Nuts and Bolts of Patenting, Technology Development/Transfer Commercialization Related Aspects, Ethics and Values in IP. Exercise: Design of research problem, data search, format, Components of IPR, Patent search/drafting	

Unit 2 15 hours	Technical writing: Technical & Scientific writing - theses, technical papers, reviews, electronic communication, research papers, etc., Poster preparation and Presentation and Dissertation. Reference Management using various softwares such as Endnote, reference manager, Refworks, etc. Communication skills – defining communication; type of communication; techniques of communication, etc Library: Classification systems, e-Library, Reference management, Web-based literature search engines Exercise: Drafting a manuscript, its reference management	CLO6
Unit 3 15 hours	Descriptive Statistics: Meaning, need and importance of statistics. Attributes and variables. Measurement and measurement scales. Collection and tabulation of data. Diagrammatic representation of frequency distribution: histogram, stem and leaf plot, pie chart. Measures: Measures of central tendency, dispersion (including box and whisker plot), skewness and kurtosis. Linear regression and correlation (Karl Pearson's and Spearman's) and residual plots. Exercise: Numerical problems based on abovementioned statistical techniques	CLO4
Unit 4 15 hours	Discrete and continuous random variables. Discrete Probability distributions like Binomial, Poisson and continuous distributions like Normal, F and student-t distribution. Differences between parametric and non-parametric statistics. Confidence interval, Errors, Levels of significance, Hypothesis testing Parametric tests: Test for parameters of Normal population (one sample and two sample problems) z-test, student's t-test, F and chi-square test and Analysis of Variance (ANOVA). Non-Parametric tests: One sample: Sign test, signed-rank test, Kolmogrov-Smirnov test, run test, Kruskal-Wallis one-way ANOVA by ranks, Friedman two-way ANOVA by ranks. Exercise: Numerical problems based on above- mentioned statistical techniques	CLO5

Course Tile: Research and Publication Ethics

 L
 T
 P
 Credits

 Paper Code: CMC.751
 2
 0
 0
 2

Learning outcomes of the course:

• Learners will be able to: -

CLO 1. Define Ethics

CLO 2. Interpret intellectual honesty and research integrity.

CLO 3. List various open access publications

CLO 4. Evaluate predatory publications and journals.

Unit/Hou	Content	Mapping
rs		with
		course
		learning
		outcomes
Unit 1	Philosophy and Ethics	CLO1
8 hours	• Introduction to Philosophy: definition, nature and	and
	scope, content, branches	CLO2
	• Ethics: definition, moral philosophy, nature of	
	moral judgements and reactions	
	Scientific Conduct	
	• Ethics with respect to science and research	
	• Intellectual honesty and research integrity	
	• Scientific misconducts: Falsification,	
	Fabrication, and Plagiarism (FFP)	
	Redundant publications: duplicate and	
	overlapping publications, salami slicing	
	• Selective reporting and misrepresentation of	
	data	
	Exercise: To make students aware bout abovementioned facts by using ppt	
Unit 2	Applied Research in Media Studies	CLO2
7 hours	• Publication ethics: definition, introduction and	0202
	importance	, CLO4
	Best practices/ standards setting initiatives and	CDOT
	guidelines: COPE, WAME, etc.	
	Conflicts of interest	
	Publication misconduct: definition, concept,	
	problems that lead to unethical behaviour and vice	
	versa, types	

	 Violation of publication ethics, authorship and contributorship Identification of publication misconduct, complaints and appeals Predatory publishers and journals Exercise: To make students aware bout abovementioned facts, Predatory publishers and journals by using ppt 	
Unit 3	Open Access Publishing	CLO2
8 hours	 Open access publications and initiatives SHERPA/RoMEO online resource to check publisher copyright & self-archiving policies Software tool to identify predatory publication developed by SPPU Journal finder/journal suggestion tools viz. JANE, Elsevier Journal Finder, Springer, Journal Suggester, Etc. Publication Misconduct Group Discussions: Subject specific ethical issues, FFP, authorship; conflicts of interest; complaints and appeals: examples and fraud from India and abroad Software tools: Use of plagiarism software like Turnitin, Urkund and other open source software tools Exercise: To arrange Group Discussions on Publication Misconduct and to check plagiarism by using above-mentioned resources 	CLO3
Unit 4	Databases and Research Metrics	CLO3
7 hours	• Databases: Indexing databases; Citation	
	database: Web of Science, Scopus etc. • Research Metrics: Impact Factor of journal as per Journal Citation Report, SNIP, SJR, IPP, Cite Score; Metrics: h-index, g-index, i10 index, almetrics Exercise: To h-index, g-index, i10 index of individual student/faculty

Course Title: Natural Products in Drug Discovery

and Development: Recent Advances

Paper Code: CMC.705

L T P Credits
4 0 0 4

Learning Outcomes:

After successfully completing this course, learner would be able to:

CLO 1. Be familiar with the prospects of natural products

CLO 2. utilise the function of natural products in living organisms, their biosynthesis and medicinal properties in their practical

Unit/Hou	Content	Mapping
rs		with
		course
		learning
		outcomes
Unit 1	Prospects of Natural Products research in the 21st	CLO1
15 hours	Century: - Introduction, use of natural products in	
	traditional medicines, Marine natural products, Use	
	of herbal remedies and the potential of drug	
	development from natural products and novel drug	
	templates: paclitaxel, podophyllotoxin, artimisinin	
	etc.	
	Exercise: To discuss latest progress made in the	
	field of natural/marine/herbal products	
Unit 2	Recent development in the research on naturally	CLO1
15 hours	occurring polyphenolic compounds: - Introduction,	
	recently reported flavonoids, flavonoids as drug	
	candidates, Biological and Pharmacological	
	activities of flavonoids (Antioxidant activity, cyto-	
	toxic activity, anticancer and anti-microbial	
	activity), Biosynthetic pathway.	
	Exercise: To discuss latest progress made in the	
	field of naturally occurring polyphenolic compounds	
Unit 3	Alkaloids: - General methods of structure	CLO2
15 hours	elucidation, degradation, classification based on	
	nitrogen heterocyclic ring, role of alkaloids in	
	plants, Structure, stereochemistry, synthesis and	
	biosynthesis of the following: Ephedrine, Nicotine	

and Morphine, Recent developments in medicinal aspects- Antimicrobial activity, antioxidant and anti-inflammatory activities of alkaloids. Exercise: To discuss latest progress made in the	
ield of alkaloids	
Perpenoids: - Old secondary metabolites with new herapeutic properties- Introduction, general biosynthesis of terpenoids, Ecological role of erpenoids and terpenoids in herbal medicines.	CLO2
Essential Oils:- Introduction, manufacturing process, processing of essential oils, uses of essential oils and composition of essential oils, Pharmacological applications. Steroids: determination and synthesis of cholesterol, Pestosterone and Progesterone, Chemical tests for esteroids, Medicinal applications of steroids.	
1 0	
	spects- Antimicrobial activity, antioxidant and nti-inflammatory activities of alkaloids. Course Title: Recent Advances in Medicinal Chemistry of Nucleic Acids

L T		P	Credits
4	0	0	4

Paper Code: CMC.706 Learning outcomes:

After successfully completing this course, learner would be able to:

- CLO 1. Design of new inhibitors of nucleic acids
- CLO 2. Drug targets in diseases like cancer and others.

Unit/Hou	Content	Mapping
rs		with
		course
		learning
		outcomes
Unit 1	Nucleic acids: Introduction, central dogma,	CLO1
15 hours	biosynthesis, structure (conformation, size, shape,	
	bending, supercoiling etc.) and functions	
	(transcription, post-transcriptional modifications	
	and translations) and damage and repair. Genetic	
	polymorphism.	
	Exercise: To discuss latest progress made in the	
	field of nucleic acids including conformation, size,	
	shape, bending, supercoiling, post-transcriptional	
	modifications and translations	
Unit 2	Protein-nucleic acid interactions: proteins	CLO1
15 hours	involved in the biosynthesis of nucleic acids,	
	enzymes in replications, transcription and	
	translation. Damage and repair enzymes and	
	epigenetic factors	
	(HDAC/nucleosomes/HATs/MTs).	
	Exercise: To discuss latest progress made in the	
	field of nucleic acids and understanding their	
	interactions with drugs	
Unit 3	Drug design and synthesis : Drugs targeting nucleic	CLO2
15 hours	acids conformations, drugs targeting associated	
	proteins, drugs mimicking, drugs targeting	

	replication/transcription/translation and the proteins mentioned in unit 2. Drugs affecting gene expression (kinase inhibitors etc.) The SAR and in silico and pharmacokinetic approaches: to be discussed wherever possible in above-mentioned topics. Exercise: To discuss latest progress made in the field of nucleic acids using nucleic acids as drug	
	targets	
Unit 4 15 hours	Nucleic acids in R&D and diseases: Diseases associated with nucleic acids (such as SNPs and chromosomal inversions etc.). Anti-nucleic acid therapies and naturally occurring small antisense RNAs (Si/micro RNA). Therapies of nucleic acids in stem cells. Vehicles mediated targeted delivery. Exercise: To discuss role of SNPs small antisense RNAs (Si/micro RNA) in treatment of different diseases	CLO2

Course Title: Emerging Trends in Green

Synthesis and Drug Discovery

Paper Code: CMC.707 Learning outcomes:

L	T	P	Credits
4	0	0	4

After successfully completing this course learner would be able to:

CLO 1. Learn and draw the mechanism of microwave assisted organic transformation

CLO 2. Conduct ionic liquids, solid-supported organic reactions under MW and conventional conditions

CLO 3. Utilize metal and organocatalysts for various C-C and C-N bond formation reactions Apply recent tools in drug discovery and developments

Unit/Hou	Content	Mapping
rs		with
		course
		learning
		outcomes
Unit 1	Microwave Assisted Organic synthesis (MAOS):	CLO1
15 hours	Heating effects of microwaves: (i) Dipolar	
	polarization and (ii) Ionic conduction, Synthesis of	
	target molecules under solventless conditions and	
	on solid support, Microwave and stereoselectivity,	
	Recent advancement in aqueous reaction conditions and microwave.	
	Exercise: To perform microwave assisted synthesis	
Unit 2	Synthesis of Bioactive molecules using Ionic	CLO2
15 hours	Liquids: Ionic liquids as green solvents,	CDCZ
10 mours	Replacement of volatile organic solvents and	
	environmental impact, Ionic liquids as catalyst,	
	Designer solvents, Ionic liquids and asymmetric	
	synthesis.	
	Exercise: To perform microwave assisted synthesis	
	using ionic liquid	
Unit 3	Developments in metal catalysis and	CLO3
15 hours	organocatalysis	
	New developments in the palladium catalyzed	
	chemistry for C-C bond formation reaction, copper	
	catalyzed C-N bond formation reactions, metal	
	catalyzed reactions under microwave conditions,	
	Solid supported reactions, Organic catalytic systems	
	Exercise: To perform microwave assisted synthesis	
	using metal catalysts	

Unit 4	Recent Trends in Drug Discovery: Computer in	CLO3		
15 hours	drug designing, Natural product based drug design,			
	Identification of target molecules, Lead candidate			
	and lead optimization, Ligands with multi receptor			
	affinity profile, Diversity oriented synthesis in drug			
	discovery, Nano drug delivery systems.			
	Exercise: To perform microwave assisted synthesis			
	of lead candidates/lead optimization using			
	microwave assisted synthesis

Course Title: Trends in Molecular Modelling for

Drug Design

Paper Code: CMC.708 Learning outcomes:

After successfully completing this course, learner would be able to:

- CLO 1. How a slight change in substituents affect the biological activity of drugs?
- CLO 2. How molecular modelling can increase efficiency.
- CLO 3. Pharmacophore and receptor-based rational drug design.

Unit/Hours	Content	Mapping with
		course
		learning
		outcomes
Unit 1 15 hours	QSAR: Introduction, history, applications, various descriptors used in QSARs: lipophilicity, electronic, stearic based descriptors. Regression analysis, significance and validity of QSAR regression equations, case study – on pyranenamine, partial least squares (PLS) analysis, multi linear regression analysis. Use of genetic algorithms, neural networks and principle components analysis in the QSAR equations. Exercise: Solving problems related to multi linear regression, genetic algorithms, neural networks and principle components analysis	CLO1
Unit 2 15 hours	2D QSAR: 2D QSAR techniques like Free-Wilson Analysis, Ban-Fujita modification, Topliss operational scheme, Craig Plot, Cluster Analysis and Hansch analysis and their applications. Exercise: To perform 2D QSAR using free softwares	CLO2
Unit 3 15 hours	3D QSAR: COMFA – 3D QSAR techniques like Comparative molecular field analysis, CoMSIA-Comparative Molecular Similarity Indices Analysis, CoMSA-Comparative Molecular Surface Analysis, SOMFA - Self-organizing molecular field analysis and their applications. Exercise: To perform 3D QSAR using free softwares	CLO3

Unit 4	Virtual Screening and Molecular docking: Drug	CLO3				
15 hours	likeness screening, Concept of pharmacophore					
	mapping and pharmacophore-based Screening,					
	Molecular docking: Rigid docking, flexible docking,					
	manual docking; Docking based screening, <i>De novo</i>					
	drug design.					
	Exercise: To perform Virtual Screening and					
	Molecular docking using free softwares

Course Title: TEACHING ASSISTANTSHIP

 L
 T
 P
 Credit

 0
 0
 2
 1

Total Hours: 30

Learning Outcome:

At the end of this skill development course, the scholars shall be able to

CLO 1. familiarize themselves with the pedagogical practices of effective class room delivery and knowledge evaluation system

CLO2. manage large and small classes using appropriate pedagogical techniques for different types of content

Activities and Evaluation:

- The scholars shall attend Master degree classes of his/her supervisor to observe the various transaction modes that the supervisor follows in the class room delivery or transaction process one period per week.
- The scholars shall be assigned one period per week under the direct supervision of his/her supervisor to teach the Master degree students adopting appropriate teaching strategy(s).
- The scholars shall be involved in examination and evaluation system of the Master degree students such as preparation of questions, conduct of examination and preparation of results under the direction of the supervisor.

Mapping with course learning outcome: CLO 1

- At the end of the semester, the supervisor shall conduct an examination of teaching skills learned by the scholar as per the following **evaluation criteria**:
- The scholars shall be given a topic relevant to the Master degree course of the current semester as his/her specialization to prepare lessons and deliver in the class room before the master degree students for one hour (45 minutes teaching + 15 minutes interaction).
- The scholars shall be evaluated for a total of 50 marks comprising *content knowledge* (10 marks), *explanation and demonstration skills* (10 marks), *communication skills* (10 marks), *teaching techniques employed* (10 marks), and classroom interactions (10).

Course Title: CURRICULUM, PEDAGOGY AND EVALUATION

L	T	P	Credit
1	0	0	1

Course Code: UNI.753

Learning outcomes:

After completion of the course, scholars shall be able to:

- CLO 1. Analyze the principles and bases of curriculum design and development
- CLO 2. Examine the processes involved in curriculum development
- CLO 3. Develop the skills of adopting innovative pedagogies and conducting students' assessment
- CLO 4. Develop curriculum of a specific course/programme

Course Content

Course Contents

Unit/Hou rs	Content	Mapping with
		course
		learning
		outcomes
